

Your Kitten's First 6 months

The vaccination needs of dogs and cats should be assessed at least yearly and, if appropriate, vaccination schedules should be modified on the basis of changes in the patients' age, health status, home, travel, environment and lifestyle. Vaccinations should be considered just one component of an individualized comprehensive preventative health-care plan.

6-8 weeks of age

- 🐾 Wellness Exam
- 🐾 Core vaccines #1 (RCP)
- 🐾 Fecal Exam
